

## XXI Jornada Odontológica de Piracicaba

### **Apresentação Categoria Paineis – Graduação**

**Data:** 01/10/2014 (Quarta-feira)

**Horário:** 14:00 às 18:00 hrs

**Banca Avaliadora 1A**

| <b>Número do Paineis</b> | <b>Nome do apresentador e título do trabalho</b>                                                                                                   |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1                        | <b>ALESSANDRO VAIL DE CAMARGO</b> - Case report of labial frenectomy associated to Moyers analysis: multidisciplinary approach                     |
| 2                        | <b>ALESSANDRO VAIL DE CAMARGO</b> - Case report: Conservative rehabilitation with glass fiber post and indirect ceramomer onlay                    |
| 3                        | <b>AMANDA DE PAIVA PEREIRA</b> - Composite direct veneer as an alternative treatment for anterior tooth without vital pulp: a case report.         |
| 4                        | <b>AMINÉRES PANSIERI COLOMBINI</b> - Facial rehabilitation with use of nasal prosthesis in oncological patient                                     |
| 5                        | <b>ANA CLÁUDIA ERVOLINO DA SILVA</b> - Biomechanical analysis of osseointegration in osteoporotic rats treated with raloxifene                     |
| 6                        | <b>VINICIUS ORTEGA</b> - Oral health status of the elderly poor community                                                                          |
| 7                        | <b>FERNANDA SANTOS</b> - Socioeconomic and behavioral analysis of group of students entered in a Preventive and Educational Oral Health Program    |
| 8                        | <b>ANA PAULA GUIDI SCHMIDT</b> - Relationship between mandibular canal and the facial type in panoramic radiographs                                |
| 9                        | <b>CAETANO POLEZI MARTINS</b> - Avaliação da qualidade das radiografias panorâmicas realizadas na clínica de Radiologia da FOP/UNICAMP             |
| 10                       | <b>CAROLINA PEREZ RANGEL</b> - Pregnant and dentistry: guidelines on oral hygiene of neonates                                                      |
| 11                       | <b>ÉVELIN LOURANCE VENZI ZULIN</b> - Psychological profile of a patient gutted by trauma and rehabilitated with individualized ocular prosthetics. |
| 12                       | <b>EWERTON ZANIBONI</b> - Histomorphometric analysis of the microcurrent stimulation                                                               |

|    |                                                                                                                                                     |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------|
|    | therapy in orthodontic tooth movement: study in Wistar rats.                                                                                        |
| 13 | <b>FÁBIO LOURENÇO FABRETTI</b> - Evaluation of the bacterial reduction at teeth with chronic apical periodontitis                                   |
| 14 | <b>FABÍOLA CRISTIANE CALDERAN</b> - Mechanical trauma as a facilitator factor for the development of oral cancer - case reports                     |
| 15 | <b>FERNANDA MARIA SOUTTO MAYOR</b> - Fine needle aspiration cytology in pleomorphic adenoma of the parotid gland: a case report.                    |
| 16 | <b>ANTONIO CORREA</b> - Bad oral health habits                                                                                                      |
| 17 | <b>ISADORA FERRARI TEIXEIRA</b> – Electromyographic activity of masticatory muscle in individuals with dentofacial deformities: preliminary results |
| 18 | <b>JULIANA FERREIRA FOGAÇA</b> - Mandibular third molars extraction as a risk factor for mandibular fractures                                       |
| 19 | <b>MAYARA ZAGHI</b> - Assessment of mandibular bone quality and correlation with impacted third / semi-impacted molars: a study by computed to      |
| 20 | <b>NATALIA SANTOS SAMPAIO DE SOUZA</b> - Child nutrition related to oral conditions                                                                 |

### **Apresentação Categoria Painel – Graduação**

**Data:** 01/10/2014 (Quarta-feira)

**Horário:** 14:00 às 18:00 hrs

**Banca Avaliadora 1B**

| <b>Número do Painel</b> | <b>Nome do apresentador e título do trabalho</b>                                                                                                         |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 21                      | <b>Removido!</b>                                                                                                                                         |
| 22                      | <b>BRUNO FREITAS TREVIZO</b> - Shear bond strength of the Y-TZP/veneer interface after surface treatment                                                 |
| 23                      | <b>Removido!</b>                                                                                                                                         |
| 24                      | <b>DANIELE RUGGERO DA COSTA</b> - Evaluation of the profile of patients who have suffered dental injuries                                                |
| 25                      | <b>CAROLINE ZEEBERG</b> - Epidemiological survey and preparation of educational and preventive strategies                                                |
| 26                      | <b>CASSIANO SALVATERRA</b> - Calcium and fluoride extraction from biofilms containing high mineral concentrations                                        |
| 27                      | <b>EDUARDA OLIVEIRA DE SOUZA</b> - General Oral Health Assessment Index – GOHAI                                                                          |
| 28                      | <b>HELLEN DE CARVALHO MORAES</b> - Oral Health Impact Profile (OHIP)                                                                                     |
| 29                      | <b>HELOISA NAVARRO PANTAROTO</b> - Bioavailability of fluoride in plasma and saliva after the ingestion of water or food prepared with fluoridated water |
| 30                      | <b>IGOR HIDEKI FUGITA</b> - Estimation of chronological age through the third molars to validate the method Dermijian on CBCT images                     |
| 31                      | <b>JULIANA LUCHESI RODRIGUES ALVES</b> – Total smile: oral health promotion for elderly                                                                  |
| 32                      | <b>MARIANA CRISTINA BARBISAN CAMPAGNOLO</b> – The use of guided surgery in rehabilitations with full arch fixed bridges implant-supported                |
| 33                      | <b>MARINA BARBOSA AZEVEDO</b> - A pilot study on stromal myofibroblasts in tongue squamous cell carcinoma of young patients                              |
| 34                      | <b>MATEUS FAVERO BARRA GRANDE</b> - Health education as a strategy for the                                                                               |

|    |                                                                                                                                 |
|----|---------------------------------------------------------------------------------------------------------------------------------|
|    | promotion of oral health in pregnancy                                                                                           |
| 35 | <b>MAICON SEBOLD</b> - Dentin Bond Strength Using Different Conditioning Treatments                                             |
| 36 | <b>MARIANA CRISTINA BARBISAN CAMPAGNOLO</b> – Deciduous ankylosed molars: a case report                                         |
| 37 | <b>REBECA MARA DOMINGUES</b> - Resin composites used to reestablish the aesthetics of color changed vital tooth: a case report. |
| 38 | <b>PATRÍCIA ALBUQUERQUE BORGES</b> - Fluoride binding to biofilm bacteria via calcium bridging                                  |
| 39 | <b>PAULO ROBERTO NEVES</b> - Kaposi's sarcoma in HIV + patients                                                                 |
| 40 | <b>RAYANE RAMOS ARAUJO</b> - Effect of sucrose and starch association on dentin demineralization, assessed by a biofilm model   |

### **Apresentação Categoria Paineis – Graduação**

**Data:** 02/10/2014 (Quinta-feira)

**Horário:** 8:00 às 12:00 hrs

**Banca Avaliadora 2A**

| <b>Número do Paineis</b> | <b>Nome do apresentador e título do trabalho</b>                                                                                                    |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1                        | <b>RENATA CAMPOS PELEGRINI</b> - Effect of chemomechanical preparation on bacterial reduction of teeth with endodontic treatment failure.           |
| 2                        | <b>STÉPHANIE MARANI MARTINS ARAÚJO</b> - Comparative photoelastic evaluation of conventional and locking plates                                     |
| 3                        | <b>THAÍS BARBIN</b> - Stress dissipation on the periimplantar mandibular bone at inferior canine region                                             |
| 4                        | <b>LEONARDO G. SONEHARA</b> - Teeth displacement of lower implant-retained complete dentures under influence of microwave flask types               |
| 5                        | <b>REBECA MONTANINI</b> - Time series analysis of dental procedures and this association with social vulnerability                                  |
| 6                        | <b>RENATA FREITAS VARANDA</b> - Incidence of ponticulus posticus in the posterior arch of the Atlas vertebra and its sexual dimorphism relationship |
| 7                        | <b>ROBERTA RUANO DALLEMOLE</b> - Influence of image filters in the diagnosis of root fractures in cone beam computed tomography                     |
| 8                        | <b>TAMIRIS CHRISTENSEN BUENO</b> - Inadequate nutrition, self-consumption of fatty foods and excess (soft drink), influencing dental erosion        |
| 9                        | <b>THAÍS RODRIGUES DE CARLI</b> - Evaluation of the susceptibility of oral streptococcus ssp. to the marking by the complement system               |
| 10                       | <b>THAISA PORTES CERQUEIRA</b> - Evaluation of contrast sensitivity function in the perception of shades of gray in periapical digital radiography  |
| 11                       | <b>BRUNO BEVENUTO LUCAS</b> - Continuing education program in oral health in 12 year-old students                                                   |
| 12                       | <b>GABRIEL PEREIRA NUNES</b> - Effect of sodium trimetaphosphate in fluoride gel on remineralization: an in situ study                              |

|    |                                                                                                                                            |
|----|--------------------------------------------------------------------------------------------------------------------------------------------|
| 13 | <b>LEDYANE DA SILVA MAFRA</b> - A programme for removal of oral habits                                                                     |
| 14 | <b>RÔMULO ANDRADE MARCATO</b> - Risk factor of the dental caries in children attended by preventive programs: longitudinal study           |
| 15 | <b>DANILO MARTHO</b> - Evaluation of stress in the bone structure around implants with different geometries – a finite element analysis    |
| 16 | <b>CHRISTIAN ALVES DOS SANTOS</b> - SEM(Scanning Electron Microscopy) evaluation of the radicular dentin subjected to different treatments |
| 17 | <b>ÁRTHUR FRACASSO STEFANO</b> - Evaluation of the effects of periodontal treatment on levels of ascorbic acid in smokers                  |
| 18 | <b>ÁRTHUR FRACASSO STEFANO</b> - Gingival dimensions and phenotypes in Blacks                                                              |
| 19 | <b>LETÍCIA PITOL PALIN</b> - Biomechanical analysis of osseointegration in osteoporotic rats treated with sodium alendronate               |

## XXI Jornada Odontológica de Piracicaba

### **Apresentação Categoria Paineis – Pós - Graduação**

**Data:** 02/10/2014 (quinta-feira)

**Horário:** 08:00 às 12:00 hrs

**Banca Avaliadora 2B**

| <b>Número do Paineis</b> | <b>Nome do apresentador e título do trabalho</b>                                                                                                                |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1                        | <b>DÉBORA PEREIRA</b> - Intra-osseous B-cell Lymphoma mimicking a periapical lesion in mandible.                                                                |
| 2                        | <b>ANDRÉ GAZETTA DE MORAES</b> - Immediate implant-supported fixed provisional mandibular prosthesis - case report.                                             |
| 3                        | <b>ANDRÉIA ALVES CARDOSO</b> - Treatment of anterior open bite with the use of directional forces – case report.                                                |
| 4                        | <b>ANDRÉS HUMBERTO CÁCERES BARRENO</b> - An unusual surgical management of complex odontoma involving the mandibular angle: Case report and literature review.. |
| 5                        | <b>ANIELE CARVALHO LACERDA</b> - Effects of sodium thiosulfate on the bond strength of self-adhesive resin cement to root dentin.                               |
| 6                        | <b>ANNA GABRIELLA CAMACHO PRESOTTO</b> - Prototyping: supporting method for sculpture in Maxillofacial Prosthesis.                                              |
| 7                        | <b>BIANCA FERNANDA ESPÓSITO SANTOS</b> - Use of composite pizoelectric surgery CVDentus for access to the floor of the maxillary sinus.                         |
| 8                        | <b>BRENO NOGUEIRA SILVA</b> - Non-surgical management of recurrent tmj dislocation.                                                                             |
| 9                        | <b>BRUNA FERNANDES MOREIRA ALFENAS</b> - Impact of rheumatoid arthritis and DTM in quality of life and patient satisfaction with their prostheses.              |
| 10                       | <b>ca.odontofop@gmail.com</b> - Subjective evaluation of masticatory function, quality of life in adolescents with and without caries and malocclusions.        |
| 11                       | <b>AMANDA FARIAS GOMES</b> - Evaluation of height and volume of the coronoid process through Cone Beam Computed Tomography exams.                               |

|    |                                                                                                                                                                                        |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12 | <b>ANA CAROLINA AMORIM PELLICOLI</b> - Analysis of the expression of Dendritic and T cells in potentially malignant lesions and oral squamous cell carcinoma.                          |
| 13 | <b>CELESTE SANCHEZ ROMERO</b> - Angioleiomyoma of the lip: histological and immunohistochemical characterization of a case                                                             |
| 14 | <b>DANILO RODRIGUES</b> - Stress in hospital nurses: influencing the systemic and oral diseases.                                                                                       |
| 15 | <b>DÉBORA DE MELO TÁVORA</b> - Estimation of sexual dimorphism by means of dental measurements on cone-beam computed tomography                                                        |
| 16 | <b>ADAIAS OLIVEIRA MATOS</b> - The role of nicotine, cotinine and caffeine on the bacterial colonization to cp-ti.                                                                     |
| 17 | <b>ELIANA DANTAS DA COSTA</b> - Development of a questionnaire to evaluate the infection control measures in Dental Radiology.                                                         |
| 18 | <b>ELIANA DANTAS DA COSTA</b> - Infection control in digital intraoral radiology.                                                                                                      |
| 19 | <b>BRUNO MASSUCATO ZEN</b> - Effect of misfit and prosthetic abutments on strain induced in overdenture – retaining system casted in Ti cp and in loosening torque of prosthetic screw |
