

Fórum IC

Local: Anfiteatro 03

Data: 02/10/14

Horário: 14h-18h

Banca: 01

- **14h: ÁRTHUR FRACASSO STEFANO** - Effect of misfit in the marginal peri-implant bone level.
- **14:15h: AUDREY FOSTER LEFORT ROCHA** - Central giant cell lesion – Case report.
- **14:30h: RENAN CARDOSO** - Case report: Planning and installation of dental implants on post auricular region of a patient with bilateral anotia.
- **14:45h: RÔMULO ANDRADE MARCATO** - Prospective review of nine cases of Ludwig's Angina caused by odontogenic infections.
- **15h: BRUNO BEVENUTO LUCAS** - The importance of dental care during the prenatal.
- **15:15h: CHRISTIAN ALVES DOS SANTOS** - Effects of phototherapy employing light emitting diodes at 940 nm in the regeneration of bone defects in rats.
- **15:30h: GABRIEL PEREIRA NUNES** - Effectiveness of fluoride products on enamel remineralization after oral rinse: a study in situ.
- **15:45h: GABRIEL PEREIRA NUNES** - Effect of adding sodium trimetaphosphate in conventional dentifrice on dental enamel demineralization.
- **16:00h: MARIANA CRISTINA BARBISAN CAMPAGNOLO** – Effectiveness of the desensitizing before dental bleaching in the reduction of the dental sensitivity

Fórum IC

Local: Anfiteatro 04

Data: 02/10/14

Horário: 14h-18h

Banca: 02

- **14h: SANDRA BECERRA JOVA** - Lymph node enlargement diagnosed as Hodgkin Lymphoma.
- **14:15h: VICTOR TRASSI FERNANDES SILVA DE SOUZA** - Effect of plasma and primer application in the bond strenght of a resin cement to zirconia-based ceramics.
- **14:30h: DANIELE RUGGERO DA COSTA** - Assessment of periodontal status of patients with chronic renal failure.
- **14:45h: JULIANA FERREIRA FOGAÇA** - Evaluation of osteoconductive potential of Bio-Oss or Bio-Oss Collagen in critical bone defects.
- **15h: LEDYANE DA SILVA MAFRA** - Comparison of the digital microscopy and conventional light microscopy in grading of oral epithelial dysplasia.
- **15:15h: MARCELO VINICIUS VALERIO** - AP relationship of the maxillary central incisors to the forehead in the class II profile attractiveness.
- **15:30h: MARCOS PAULO MONTANHANA BASSO** - Vascular endothelial growth factor is upregulated in malignant salivary gland tumors.
- **15:45h: PATRICIA MARIA FERNANDES** - Dosimetric distribution to the teeth of patients with head and neck cancer who have undergone radiotherapy.
- **16h: KAROL SARTORI LIMA** - Effects on salivary gland of rats exposed to methylphenidate during pregnancy.

Fórum PIC Jr. (Painel)

Local: Anfiteatro 1

Data: 02/10/14

Horário: 16h-18h

Banca: 01

- **14h: FABIO HENRIQUE BORTOLAZO SANDRA** - Caries: causes, symptoms, treatment and prevention.
- **14:15h: LETÍCIA AGUADO CARDOSO** - Antimicrobial tests of copaiba oil (Copaifera multijuga) against microorganisms.
- **14:30h: SABRINA ROMÃO GONÇALVES COELHO** - Periodontal diseases: etiology, symptoms, treatment and prevention.
- **14:45h: VIVIAN RIBEIRO BLASIG** - Dental treatment and its impact on quality of life: project on the application of Oralimpacts on daily performance index.

Fórum PG

Local: Anfiteatro 02

Data: 03/10/14

Horário: 14h-18h

Banca: 01

- **14h: ANA CAROLINA PIMENTEL CORRÊA** - Use of sodium thiosulfate to neutralize residual hydrogen peroxide after internal bleaching: in vitro study.
- **14:15h: ANTONIO GABRIEL LANATA FLORES** - Epidemiologic evaluation of the facial trauma in elderly patients treated in the Maxillo-facial surgery Area FOP-UNICAMP.
- **14:30h: CÁSSIA MARIA GRILLO** - Can acupuncture help to increase amplitude of mouth opening?
- **14:45h: CÁSSIA MARIA GRILLO** - Acupuncture and occlusal appliance in pain management of temporomandibular dysfunction evaluated at two pain scales.
- **15h: CRISTIANE RUMI FUJIWARA YANIKIAN** - Influence of liquid glass on the surface free energy, color change and Streptococcus mutans adhesion in composite resin.
- **15:15h: CRISTINA EMÖKE ERIKA MÜLLER** - Ultrasound elastography strain ratio of upper trapezius myofascial trigger points in women during chronic pain treatment.
- **15:30h: DARLLE SANTOS ARAUJO** - Evaluation of parameters of masticatory function in overweight and obese children.
- **15:45h: DOUGLAS RANGEL GOULART** - Similarities in the condylar morphology in patients with skeletal Class III and Hiperplasia Condylar.
- **16h: CLEITON PITA DOS SANTOS** - Cytotoxicity and anesthetic efficacy of lidocaine encapsulated in poly (epsilon-caprolactone) nanocapsules.
- **16:15h: DAYSE ANDRADE ROMÃO** - Validation of an erosion cycling model to estimate the pH dose-response effect on enamel initial erosion.
- **16:30h: JONNY BURGA-SÁCHEZ** - The articaine-2-hydroxypropyl-β-cyclodextrin inclusion complex reduce cytotoxicity induced by plain articaine.

- **16:45h: JUANA ROSMERI SALAS HUAMANI** - Effectiveness of audiovisual stimuli in the practice of toothbrushing of Peruvians schoolchildren with Down syndrome.
- **17h: KARINA MORAIS FARIA** – Evaluation of direct effects of radiation on dental pulp micromorphology.

Fórum PG

Local: Anfiteatro 03

Data: 03/10/14

Horário: 14h – 18h

Banca: 02

- **14h: EDER ALBERTO SIGUA-RODRIGUEZ** - Photoelastic analysis on different protocols rehabilitation using dental implants in atrophic edentulous maxilla.
- **14:15h: FLÁVIO RODRIGUES SOARES JÚNIOR** - The importance of dental surgeon to the front diagnosis, treatment and continuous monitoring syndrome of patients gorlin.
- **14:30h: GABRIEL NIMA BERMEJO** - Bond strength and interfacial micromorphology of multimode adhesive and resin cements to root-canal dentin.
- **14:45h: JESSICA DIAS THEOBALDO** - Effect of pre-heating and light-curing unit on physical properties of a bulk fill composite.
- **15:00h: JOSSARIA PEREIRA DE SOUSA** - Influence of MI Paste™ and different adhesive systems on microtensile bond strength of demineralized dentin.
- **15:15h: LENITA MARANGONI LOPES** - Salivary changes in children with hodgkin's lymphoma treated with radiotherapy.
- **15:30: NÚBIA PAVESI PINI** - Effect of different toothpaste on eroded enamel and dentin under hyposalivatory conditions: An in situ pilot study.
- **15:45h: PEDRO DINIZ REBOUÇAS** – Occurrence of permanent teeth avulsion in an oraldental trauma center: A 12 years retrospective study.
- **16:00h: LIVIA JACOVASSI TAVARES** - Cytotoxic effect of curcumin on epithelial cells in co-culture with Candida species in photodynamic therapy.
- **16:15h: MARIANA DE PAULI PAGLIONI** - Micromorphological evaluation of teeth exposed to head and neck radiotherapy.
- **16:30: POLYANE MAZUCATTO QUEIROZ** - Evaluation of radioprotective and reparative effects of compounds of Aloe Vera, Zinc / Copper and Yerba Mate in irradiat.

- **16:45h: POLYANE MAZUCATTO QUEIROZ-** Detection of caries lesions using different MicroCT scan modes (180°/360°.)
- **17:00h: RAFAEL ARAUJO –** Modern and documented Brazilian Osteological Collection.

Fórum PG

Local: Anfiteatro 04

Data: 03/10/14

Horário: 14h-18h

Banca: 03

- **14h: PRISCILA MONTEIRO JARDIM** - Indication of surgical treatment of fractures of mandibular condyle.
- **14:15h: RAQUEL CORREIA DE MEDEIROS** - Mandibular body fracture: pattern and treatment.
- **14:30h: SARAH TEIXEIRA COSTA** - Finite element analysis utilization in craniofacial gunshot wounds.
- **14:45h: SARAH TEIXEIRA COSTA** - Morphological analysis of entry wounds produced by projectiles fired at human mandible by finite element method.
- **15h: SÉRGIO SPEZZIA** - Influence of hormonal factors in periodontal tissues.
- **15:15h: THAIS MARQUES SIMEK VEGA GONÇALVES** – Denture adhesives improve mastication in denture wearers.
- **15:30h: WALDEMIR FRANCISCO VIEIRA JUNIOR** - Chromatic and morphologic analysis of bleached enamel exposed to different mouthrinses.
- **15:45: ZARINA TATIA BARBOSA VIEIRA DOS SANTOS** - TMJ function after partial condylectomy in active mandibular condylar hyperplasia.
- **16h: RODRIGO NEVES SILVA** - Childhood hyperbilirubinemia affects the micromorphology of human dentin.
- **16:15h: TALITA SIGNORETI GRAZIANO** - Statins and antimicrobial effects: simvastatin as a potencial drug against Staphylococcus aureus biofilm.
- **16:30h: VERA LUCIA RASERA ZOTELLI** - Do patients' expectations influence the results of acupuncture?
- **17h: WAGNER GOMES DA SILVA** - Matrix metaloproteinases immunohistochemical expresion and gelatinolytic activity of in vivo irradiated teeth.

- **17:15h: MARIA DA LUZ ROSARIO DE SOUSA** - Self-perception of oral health by long-living elders.
